

## Rap News 1 - Nasa Bombs the Moon

*Lyrics by Hugo Farrant and Giordano Nanni*

Good afternoon, Youtube, and Welcome to Juice News  
I`m Robert Foster, and this I s the top spot for true views  
lead story this afternoon is this, You Lunatics!  
NASA to send a missile to blast the moon to bits

I have with me in the studio, General Baxter  
Veteran, Gentleman and representative of NASA  
Good to have you here, General, Good to be here Bob  
Now this is something that we hear a lot

Has Nasa Completely Lost it? What do you say to that?  
Ha ha, Bob, Take it back, No, just kidding, you know that  
the whole fact is we`re itching to go back  
To the moon with a human but have no cash  
And no craft, But we can`t hold back, we gotta start it  
Those sneaky Ruskies are throwing flags under the antarctic

Besides, jeez! The Chinese might seize the bull by the teets and plant their own flag  
Let`s face it, we got what it takes to win  
if God had wanted Communists in space He would a gave em wings

But seriously, You need to just see  
The moon is a motherlode of Helium 3  
Just twenty three tonnes is enough to power the US  
For a year at least

OK so please can you say what the objective of the plan is?  
The plan is we`ve used all the earth`s resources, damn it  
If there`s some gas we`ll grab it, Land, we`ll have  
Yehaaw, there`s gold in them there planets

So the first mission objective is to save expenses  
The second objective is to generate attention  
So our budget don`t get axed at the next election  
Thirdly we`re detecting if the moon can assume the role of space waste collection

forthly we wanna build a lunar fortress  
a staging post to get the universe and the moon`s resources  
Ice, diamonds, coal, cheese, brown people, mining minerals  
Thank you for your time general

it all sounds sensible, but is it a good decision  
But some are convinced there`s a dark side of the moon mission  
Now with direct link via satellite feed  
Is Terrence MoonSeed from the lunar defence league

Mr MoonSeed? Shut up, Bob, you better listen  
This unprovoked attack on the moon is terrorism  
Which the Shining Ones, and the Galactic force  
may well consider to be earth`s first act of war

and amateur astronomers are planning stupid parties  
Where they`ll grab their telescopes and view a kamikaze  
missile slamming into the lunar target  
of the Nasa masons and the goddam corrupt Illuminati

You see, you need to see things mythically  
Then you`ll begin to understand the conspiracy  
The moon is the feminine, the huntress, Diana  
And it`s like 12 years since they sacrificed princess Diana

The moon is what helps the earth spin dammit!  
Controls the tides, precession, it`s our twin planet  
And Nasa wants to bomb it? It`s hollow: We might crack it!  
If this mission goes ahead, The L D L will hijack it!

Alright, thanks kid, General, your responses?  
Bob, I`m not even deigning to respond to this dumb kid  
Terrorism, kid I`ll give you a terrorised face  
Would you rather North Korea colonised space

We need to get up there and chart the minerals  
You goddamn hippy bleeding heart liberals  
We`re tryna leave this world and build a better one

This is the cheapest mission Nasa has ever done

And it`s also the first attack on a neighbour  
Goddamit - You`re not a servant of the world you`re a traitor  
A traitor, boy, I`m gonna beat you with spanners  
Take you to a fema camp and teach you some manners

Manners! General, Nasa is now a disgrace  
This mission contravenes article four of the treaty on outer space  
We`re out of place, they`re singing the fake scriptures  
For the bildabergs and the reptilian shapeshifters

Everybody should be up in arms: it`s the moon  
It`s just the moon! We never even went to the moon  
@@@k you!  
Now hang on General, before this gets too far  
bombing moons, are we turning the world into a death star?

What do you mean? well we`re paving earth  
Making it grey, erasing Nature`s worth  
Now, we attack another planet, degrading it  
All the hollywood movies show aliens invading us

But that`s exactly what we`re becoming! violence  
it`s inside us isn`t this the spreading of the human virus?  
That`s horseshit, Bob! Human virus!  
We`re the rulers of the universe, look at your bibles

Bibles? These babylonians worship Isis,  
And now they`re gonna bomb where the ice is  
So they can bottle it and sell it to us for inflated prices  
And you want to pay fair prices for your moon ices?  
precisely!  
So it`s economics and prices rather than bombing the moon that`s the crisis  
These guys are rich! We just want a piece of the pie bitch  
I mean it`s all wrong, Obama`s bomb is wrong  
Ok, that`s about it for the show today  
But before we go away  
I`ll leave you with this thought as the days revolving

We may have problems, but is this our only way to solve them?

Just bomb them? Aren't we supposed to be evolving?

Yet here we are responding... Problem? Bomb them!

As for colonising space, and the Infinite system

Should we be allowed on another planet before we've even learned to live on this one?

Well, whatever should happen to the moon on October ninth,

This is Robert Foster for Juice News signing off, good night.
